Date of Issuance: June 1, 2010

The next edition of this Code is scheduled for publication in 2012. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. The interpretations will be included with this edition. Interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org> as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

Mandatory Appendix E	Flexibility and Stress Intensification Factors	130
Mandatory Appendix F	Extruded Headers and Welded Branch Connections	136
Mandatory Appendix G	Testing of Welders Limited to Work on Lines Operating at Hoop Stresses of Less Than 20% of the Specified Minimum Yield Strength	144
Mandatory Appendix H	Flattening Test for Pipe	145
Mandatory Appendix I	End Preparations for Buttwelding	146
Nonmandatory Appendix J	Commonly Used Conversion Factors	155

Mandatory Appendix K	Criteria for Cathodic Protection	159
Nonmandatory Appendix L	Determination of Remaining Strength of Corroded Pipe	161
Nonmandatory Appendix M	Gas Leakage Control Criteria	162
Nonmandatory Appendix N	Recommended Practice for Hydrostatic Testing of Pipelines in Place	169
Nonmandatory Appendix O	Preparation of Technical Inquiries	171
Nonmandatory Appendix P	Nomenclature for Figures	172
Mandatory Appendix Q	Scope Diagrams	173
Nonmandatory Appendix R	Estimating Strain in Dents	176
Index		177

FOREWORD

The need for a national code for pressure piping became increasingly evident from 1915 to 1925. To meet this need, the American Engineering Standards Committee (later changed to the American Standards Association, now the American National Standards Institute) initiated Project B31 in March 1926 at the request of the American Society of Mechanical Engineers and with that Society as sole sponsor. After several years of work by Sectional Committee B31 and its subcommittees, a first Edition was published in 1935 as an American Tentative Standard Code for Pressure Piping.

A revision of the original tentative standard began in 1937. Several more years of effort were given to securing uniformity among sections, eliminating divergent requirements and discrepancies, keeping the Code abreast of current developments in welding technique, calculating stress computations, and including reference to new dimensional and material standards. During this period, a new section added on refrigeration piping was prepared in cooperation with the American Society of Refrigeration Engineers and complemented the American Standard Code for Mechanical Refrigeration. This work culminated in the 1942 American Standard Code for Pressure Piping.

Supplements 1 and 2 of the 1942 Code, which appeared in 1944 and 1947, respectively, introduced new dimensional and material standards, a new formula for pipe wall thickness, and more comprehensive requirements for instrument and control piping. Shortly after the 1942 Code was issued, procedures were established for handling inquiries requiring explanation or interpretation of Code requirements and for publishing such inquiries and answers in *Mechanical Engineering* for the information of all concerned.

By 1948, continuing increases in the severity of service conditions combined with the development of new materials and designs to meet these higher requirements warranted more extensive changes in the Code than could be provided from supplements alone. The decision was reached by the American Standards Association and the sponsor to reorganize the sectional committee and its several subcommittees and to invite the various interested bodies to reaffirm their representatives or to designate new ones.

Because of the wide field involved, between 30 and 40 different engineering societies, government bureaus, trade associations, institutes, and similar organizations have had one or more representatives on the sectional committee, plus a few "members at large" to represent general interests. Code activities have been subdivided according to the scope of the several sections. General direction of Code activities rested with the Standards Committee officers and an executive committee, membership of which consisted principally of Standards Committee officers and section chairmen.

Following its reorganization in 1948, Standards Committee B31 made an intensive review of the 1942 Code that resulted in

- (a) a general revision and extension of requirements to agree with present day practice
- (b) the revision of references to existing dimensional standards and material specifications and the addition of references to the new ones
- (c) the clarification of ambiguous or conflicting requirements

A revision was presented for letter ballot vote of Standards Committee B31. Following approval by this body, the project was approved by the sponsor organization and by the American Standards Association. It was finally designated as an American Standard in February 1951, with the designation B31.1-1951.

Standards Committee B31 at its annual meeting of November 29, 1951, authorized the separate publication of a section of the Code for Pressure Piping addressing gas transmission and distribution piping systems, to be complete with the applicable parts of Section 2, Gas and Air Piping Systems, Section 6, Fabrication Details, and Section 7, Materials — Their Specifications and Identification. The purpose was to provide an integrated document for gas transmission and distribution piping that would not require cross-referencing to other sections of the Code.

The first Edition of this integrated document, known as American Standard Code for Pressure Piping, Section 8, Gas Transmission and Distribution Piping Systems, was published in 1952 and consisted almost entirely of material taken from Sections 2, 6, and 7 of the 1951 Edition of the Pressure Piping Code.

A new section committee was organized in 1952 to update Section 8 as necessary to address modern materials and methods of construction and operation.

After a review by B31 Executive and Standards Committees in 1955, a decision was made to develop and publish industry sections as separate Code documents of the American Standard B31 Code for Pressure Piping. The 1955 Edition constituted a general revision of the 1952 Edition with a considerably expanded scope. Further experience in the application of the Code resulted in revisions in 1958, 1963, 1966, 1967, 1968, 1969, 1975, and 1982.

In December 1978, the American National Standards Committee B31 was reorganized as the ASME Code for Pressure Piping, B31 Committee. The code designation was also changed to ANSI/ASME B31.

The 1989 Edition of the Code was a compilation of the 1986 Edition and the subsequent addenda issued to the 1986 Edition.

The 1992 Edition of the Code was a compilation of the 1989 Edition, the subsequent three addenda, and the two special Errata issued to the 1989 Edition.

The 1995 Edition of the Code is a compilation of the 1992 Edition and the subsequent three addenda issued to the 1992 Edition.

The 1999 Edition of the Code is a compilation of the 1995 Edition and the revisions that have occurred since the issuance of the 1995 Edition.

The 2003 Edition of the Code is a compilation of the 1999 Edition and revisions that have occurred since the issuance of the 1999 Edition.

The 2007 Edition of the Code is a compilation of the 2003 Edition and revisions that have occurred since the issuance of the 2003 Edition. This Edition was approved by the American National Standards Institute on September 25, 2007.

The 2010 Edition of the Code is a compilation of the 2007 Edition and revisions that have occurred since the issuance of the 2007 Edition. This Edition was approved by the American National Standards Institute on January 25, 2010.

ASME CODE FOR PRESSURE PIPING, B31

(The following is the roster of the Committee at the time of approval of this Code.)

STANDARDS COMMITTEE OFFICERS

M. L. Nayyar, *Chair*
K. C. Bodenhamer, *Vice Chair*
N. Lobo, *Secretary*

STANDARDS COMMITTEE PERSONNEL

R. J. T. Appleby , ExxonMobil Upstream Research Co.	W. J. Koves , <i>Ex-Officio</i> , UOP LLC
R. A. Appleton , <i>Contributing Member</i> , Refrigeration Systems Co.	N. Lobo , The American Society of Mechanical Engineers
C. Becht IV , Becht Engineering Co.	W. J. Mauro , American Electric Power
A. E. Beyer , Fluor Enterprises	C. J. Melo , <i>Alternate</i> , Worleyparsons
K. C. Bodenhamer , Enterprise Products Co.	J. E. Meyer , Louis Perry and Associates, Inc.
C. J. Campbell , Air Liquide	E. Michalopoulos , University of Macedonia
J. S. Chin , TransCanada Pipeline U.S.	M. L. Nayyar , Bechtel Power Corp.
D. D. Christian , Victaulic	R. G. Payne , Alstom Power, Inc.
D. L. Coym , Worley Parsons	J. T. Powers , Worley Parsons
R. P. Deubler , Fronex Poer Systems, LLC	A. P. Rangus , <i>Ex-Officio</i> , Bechtel
J. A. Drake , Spectra Energy Transmission	E. H. Rinaca , Dominion Resources, Inc.
P. D. Flenner , Flenner Engineering Services	M. J. Rosenfeld , Kiefner and Associates, Inc.
J. W. Frey , Stress Engineering Service, Inc.	R. J. Silvia , Process Engineers and Constructors, Inc.
D. R. Frikken , Becht Engineering Co.	A. Soni , <i>Delegate</i> , Engineers India Ltd.
R. A. Grichuk , Fluor Corp.	W. J. Sperko , Sperko Engineering Services, Inc.
R. W. Haupt , Pressure Piping Engineering Associates, Inc.	F. W. Tatar , FM Global
L. E. Hayden, Jr. , Consultant	K. A. Vilminot , Black and Veatch
B. P. Holbrook , Babcock Power, Inc.	A. L. Watkins , First Energy Corp.
G. A. Jolly , Vogt Valves/Flowserve Corp.	K. H. Wooten , ConocoPhillips Pipe Line Co.

B31.8 GAS TRANSMISSION AND DISTRIBUTION PIPING SYSTEMS SECTION COMMITTEE

J. A. Drake , <i>Chair</i> , Spectra Energy Transmission	K. G. Lewis , P-PIC, LLC
M. J. Rosenfeld , <i>Vice Chair</i> , Kiefner and Associates, Inc.	R. D. Lewis , Rosen USA
R. J. Horvath, Jr. , <i>Secretary</i> , The American Society of Mechanical Engineers	C. A. Mancuso , ExxonMobil Production Co.
D. D. Anderson , NiSource Gas Transmission and Storage	W. J. Manegold , Pacific Gas and Electric
R. J. T. Appleby , ExxonMobil Upstream Research Co.	M. J. Mechlowicz , Southern California Gas Co.
R. C. Becken , Energy Experts International	C. J. Miller , Fluor Enterprises, Inc.
C. A. Bullock , Centerpoint Energy	D. K. Moore , El Paso Pipeline Group
J. S. Chin , TransCanada Pipeline US	R. A. Mueller , MCM Technology
S. C. Christensen , Consultant	G. E. Ortega , ConocoPhillips
A. M. Clarke , Spectra Energy Transmission	B. J. Powell , Nisource, Inc.
P. M. Dickinson , Forerunner Corp.	C. G. Roberts , Fluor
J. W. Fee , Universal Pegasus	R. A. Schmidt , Hackney Ladish, Inc.
D. J. Fetzner , BP Exploration (Alaska), Inc.	A. Soni , <i>Delegate</i> , Engineers India Ltd.
E. N. Freeman , T. D. Williamson, Inc.	C. J. Tateosian , Gas System Engineering, Inc.
R. W. Gailing , Southern California Gas Co.	P. L. Vaughn , ONEOK Partners, LP
M. W. Gragg , ExxonMobil Development Co.	F. R. Volgstadt , Volgstadt and Associates, Inc.
S. C. Gupta , <i>Delegate</i> , Bharat Petroleum Corp. Ltd.	W. J. Walsh , EN Engineering
M. E. Hovis , Panhandle Energy	D. H. Whitley , MATE
M. D. Huston , ONEOK Partners, LP	J. K. Wilson , Williams
D. L. Johnson , Panhandle Energy	R. A. Wolf , Consultant
K. B. Kaplan , KBR	K. F. Wrenn, Jr. , Wrentech Services, LLC
R. W. Kivela , Spectra Energy Transmission	D. W. Wright , Wright Tech Services, LLC
M. P. Lamontagne , Lamontagne Pipeline Assessment Corp.	M. R. Zerella , National Grid
	J. Zhou , TransCanada Pipelines Ltd.
	J. S. Zurcher , P-PIC, LLC

B31.8 SUBGROUP ON DESIGN, MATERIALS, AND CONSTRUCTION

J. S. Chin, *Chair*, TransCanada Pipeline U.S.
R. J. T. Appleby, ExxonMobil Upstream Research Co.
R. C. Becken, Energy Experts International
A. M. Clarke, Spectra Energy Transmission
P. M. Dickinson, Forerunner Corp.
D. J. Fetzner, BP Exploration (Alaska), Inc.
R. W. Gailing, Southern California Gas Co.
M. D. Huston, ONEOK Partners, LP
K. B. Kaplan, KBR
M. J. Mechlowicz, Southern California Gas Co.
C. J. Miller, Fluor Enterprises, Inc.
E. K. Newton, Southern California Gas Co.
G. E. Ortega, ConocoPhillips
C. G. Roberts, Fluor
M. J. Rosenfeld, Kiefner and Associates, Inc.
R. A. Schmidt, Hackney Ladish, Inc.
C. J. Tateosian, Gas System Engineering, Inc.
P. L. Vaughn, ONEOK Partners, LP
F. R. Volgstadt, Volgstadt and Associates, Inc.
W. J. Walsh, EN Engineering
D. H. Whitley, MATE
J. Zhou, TransCanada Pipelines Ltd.

B31.8 SUBGROUP ON EDITORIAL REVIEW

D. K. Moore, *Chair*, El Paso Pipeline Group
R. C. Becken, Energy Experts International
R. W. Gailing, Southern California Gas Co.
K. B. Kaplan, KBR
K. G. Lewis, P-PIC, LLC
R. D. Lewis, H. Rosen U.S.A., Inc.

B31.8 SUBGROUP ON OFFSHORE PIPELINES

K. B. Kaplan, *Chair*, KBR
R. J. T. Appleby, ExxonMobil Upstream Research Co.
M. W. Gragg, El Paso Pipeline Group

B31.8 SUBGROUP ON OPERATION AND MAINTENANCE

D. D. Anderson, *Chair*, NiSource Gas Transmission and Storage
D. E. Adler, *Corresponding Member*, Colombia Gas Transmission
C. A. Bullock, Centerpoint Energy
A. M. Clarke, Spectra Energy Transmission
D. M. Fox, Atmos Energy
E. N. Freeman, T. D. Williamson, Inc.
M. E. Hovis, Panhandle Energy
M. Israni, PHMSA/DOT
D. L. Johnson, Panhandle Energy
R. W. Kivela, Spectra Energy Transmission
M. P. Lamontagne, Lamontagne Pipeline Assessment Corp.
K. G. Lewis, P-PIC, LLC
R. D. Lewis, Rosen USA
C. A. Mancuso, ExxonMobil Production Co.
W. J. Manegold, Pacific Gas and Electric
D. K. Moore, El Paso Pipeline Group
R. A. Mueller, MCM Technologies
B. J. Powell, Nisource, Inc.
J. K. Wilson, Williams
D. W. Wright, Wright Tech Services, LLC
M. R. Zerella, National Grid
J. S. Zurcher, P-PIC, LLC

B31 EXECUTIVE COMMITTEE

N. Lobo, *Secretary*, The American Society of Mechanical Engineers
C. B. Becht IV, Becht Engineering Co.
K. C. Bodenhamer, Enterprise Products Co.
D. A. Christian, Victaulic
J. A. Drake, Spectra Energy Transmission
P. D. Flenner, Flenner Engineering Services
D. R. Frikken, Becht Engineering Co.
R. W. Haupt, Pressure Piping Engineering Assoc., Inc.
L. E. Hayden, Jr., Consultant
B. P. Holbrook, Babcock Power, Inc.
G. A. Jolly, Vogt Valves/Flowserve Corp.
W. J. Koves, UOP LLC
E. Michalopoulos, University of Macedonia
M. L. Nayyar, Bechtel Power Corp.
R. G. Payne, Alstom Power, Inc.
A. P. Rangus, Bechtel
W. J. Sperko, Sperko Engineering Services, Inc.
K. H. Wooten, ConocoPhillips Pipe Line Co.

B31 FABRICATION AND EXAMINATION TECHNICAL COMMITTEE

A. P. Rangus, *Chair*, Bechtel
R. J. Horvath, Jr., *Secretary*, The American Society of Mechanical Engineers
J. P. Ellenberger, WFI Division, Bonney Forge
R. J. Ferguson, Metallurgist
D. J. Fetzner, BP Exploration (Alaska), Inc.
P. D. Flenner, Flenner Engineering Services
J. W. Frey, Stress Engineering Service, Inc.
W. W. Lewis, E. I. DuPont
S. P. Licud, Weirich Consulting Services, Inc.
A. D. Nalbandian, Thielsch Engineering, Inc.
R. I. Seals, Consultant
R. J. Silvia, Process Engineers and Constructors, Inc.
W. J. Sperko, Sperko Engineering Services, Inc.
E. F. Summers, Jr., Babcock and Wilcox Construction Co.
P. L. Vaughan, ONEOK Partners

B31 MATERIALS TECHNICAL COMMITTEE

- R. A. Grichuk**, *Chair*, Fluor Corp.
N. Lobo, *Secretary*, The American Society of Mechanical Engineers
M. H. Barnes, Scantec, Inc.
J. A. Cox, Lieberman Consulting LLC
R. P. Deubler, Fronex Power Systems LLC
Z. Djilali, *Contributing Member*, BEREP
- W. H. Eskridge, Jr.**, Aker Kvaerner E and C
C. L. Henley, Black and Veatch
D. W. Rahoi, Metallurgist
R. A. Schmidt, Hackney Ladish, Inc.
H. R. Simpson, Industry and Energy Associates, LLC
J. L. Smith, Jacobs Engineering Group

B31 MECHANICAL DESIGN TECHNICAL COMMITTEE

- W. J. Koves**, *Chair*, UOP LLC
G. A. Antaki, *Vice Chair*, Becht Engineering Co., Inc.
C. E. O'Brien, *Secretary*, The American Society of Mechanical Engineers
C. Becht IV, Becht Engineering Co.
J. P. Breen, Becht Engineering Co.
N. F. Consumo, GE Energy (IGCC)
J. P. Ellenberger, WFI Division, Bonney Forge
D. J. Fetzner, BP Exploration (Alaska), Inc.
J. A. Graziano, Tennessee Valley Authority
J. D. Hart, SSD, Inc.
- R. W. Haupt**, Pressure Piping Engineering Associates, Inc.

B31 QUALIFICATION OF PIPELINE PERSONNEL TECHNICAL COMMITTEE

- J. T. Schmitz**, *Chair*, Southwest Gas Corp.
D. K. Moore, *Vice Chair*, El Paso Pipeline Group
P. D. Stumpf, *Secretary*, The American Society of Mechanical Engineers
L. B. Ables, EPCO, Inc.
W. Bannister, BP Pipelines (North America), Inc.
M. Burkhart, Nicor Gas
G. E. Carter, State of California/Public Utilities Committee
J. S. Chin, TransCanada Pipeline U.S.
M. R. Comstock, *Contributing Member*, City of Mesa/Gas Division
G. M. Cowden, Equitable Resources
K. Dent, Spectra Energy Transmission
R. Evans, PHMSA/DOT
M. A. Gruenberg, Southwest Gas Corp.
S. C. Gupta, *Delegate*, Bharat Petroleum Corp. Ltd.
D. Haifleigh, Flint Hills Resources LP
L. M. Haynos, Kansas Corporation Commission
B. A. Heck, Miller Pipeline Corp.
L. L. Hughes, Lecet
S. Kaminska, Shell Pipeline Co.
- T. J. Kasprzyk**, Teco Peoples Gas
T. M. Lael, *Contributing Member*, ConocoPhillips Pipe Line Co.
A. J. Livingston, El Paso Pipeline Group
D. D. Lykken, Washington Utilities and Transportation Commission
W. B. McGaughey, Jr., *Contributing Member*, U.S. DOT/PHMSA
T. Meek, *Contributing Member*, El Paso Corp.
W. Miller, PHMSA
L. P. Murray, *Contributing Member*, Midwest Energy Associates
J. Myers, *Contributing Member*, EPCO, Inc.
K. Riddle, *Contributing Member*, Magellan Midstream Partners, L. P.
D. Ristig, Center Point Energy Gas Transmission
R. L. Ryan, T. D. Williamson, Inc.
R. E. Sanders, *Contributing Member*, U.S. DOT/PHMSA
E. W. Scott, Ameren
R. C. Smith, AGL Resources
R. L. Stump, Consumers Energy
D. E. Thacker, Kinder Morgan, Inc.
T. I. Tiger, Oklahoma Corporation Commission
A. N. Welker, Infrsource Underground
K. Wester-Hayes, *Contributing Member*, Explorer Pipeline Co.

INTRODUCTION

The ASME Code for Pressure Piping consists of many individually published sections, each an American National Standard. Hereafter, in this Introduction and in the text of this Code Section, B31.8, when the word “Code” is used without specific identification, it means this Code Section.

The Code sets forth engineering requirements deemed necessary for the safe design and construction of pressure piping. Although safety is the basic consideration, this factor alone will not necessarily govern the final specifications of any piping system. The designer is cautioned that the Code is not a design handbook; it does not eliminate the need for the designer or for competent engineering judgment.

To the greatest possible extent, Code requirements for design are stated in terms of basic design principles and formulas. These are supplemented as necessary with specific requirements to ensure uniform application of principles and to guide selection and application of piping elements. The Code prohibits designs and practices known to be unsafe and contains warnings where caution, but not prohibition, is warranted.

This Code Section includes

- (a) references to acceptable material specifications and component standards, including dimensional and mechanical property requirements
- (b) requirements for designing components and assemblies
- (c) requirements and data for evaluating and limiting stresses, reactions, and movements associated with pressure, temperature changes, and other forces
- (d) guidance and limitations on selecting and applying materials, components, and joining methods
- (e) requirements for fabricating, assembling, and installing piping
- (f) requirements for examining, inspecting, and testing piping
- (g) procedures for operation and maintenance that are essential to public safety
- (h) provisions for protecting pipelines from external and internal corrosion

It is intended that this Edition of Code Section B31.8 and any subsequent addenda not be retroactive. The latest edition and addenda issued at least 6 months before the original contract date for the first phase of activity covering a piping system or systems shall be the governing document, unless agreement is specifically made between contracting parties to use another issue, or unless the regulatory body having jurisdiction

imposes the use of another issue or different requirements.

Users of this Code are cautioned against making use of revisions without assurance that they are acceptable to any authorities of jurisdiction where the piping is to be installed.

The Code is under the direction of ASME Committee B31, Code for Pressure Piping, which is organized and operates under procedures of The American Society of Mechanical Engineers that have been accredited by the American National Standards Institute. The Committee is a continuing one and keeps all Code Sections current with new developments in materials, construction, and industrial practice.

When no Section of the ASME Code for Pressure Piping specifically covers a piping system, the user has discretion to select any Section determined to be generally applicable; however, it is cautioned that supplementary requirements to the Section chosen may be necessary to provide for a safe piping system for the intended application. Technical limitations of the various Sections, legal requirements, and possible applicability of other Codes or Standards are some of the factors to be considered by the user in determining the applicability of any Section of this Code.

Appendices

This Code contains two kinds of appendices: mandatory and nonmandatory. Mandatory appendices contain materials the user needs to carry out a requirement or recommendation in the main text of the Code. Nonmandatory appendices, which are written in mandatory language, are offered for application at the user’s discretion.

Interpretations and Revisions

The Committee has established an orderly procedure to consider requests for interpretation and revision of Code requirements. To receive consideration, inquiries must be in writing and must give full particulars. (See Nonmandatory Appendix O covering preparation of technical inquiries.)

The approved reply to an inquiry will be sent directly to the inquirer. In addition, the question and reply will be published as part of an Interpretation Supplement to the Code Section, issued with the revisions.

Requests for interpretation and suggestions for revision should be addressed to the Secretary, ASME B31 Committee, c/o The American Society of Mechanical

Engineers, Three Park Avenue, New York, NY 10016-5990.

Cases

A Case is the prescribed form of reply to an inquiry when study indicates that the Code wording needs clarification or when the reply modifies existing requirements of the Code or grants permission to use new materials or alternative constructions. Proposed Cases are published in *Mechanical Engineering* for public review. In addition, the Case will be published as part of an Interpretation Supplement issued with Addenda to the applicable Code Section.

A Case is normally issued for a limited period, after which it may be renewed, incorporated in the Code, or allowed to expire if there is no indication of further need for the requirements covered by the Case. The provisions of a Case, however, may be used after its expiration or withdrawal, provided the Case was effective on the

original contract date or was adopted before completion of the work, and the contracting parties agree to its use.

Materials are listed in the Stress Tables only when sufficient usage in piping within the scope of the Code has been shown. Materials may be covered by a Case. Requests for listing shall include evidence of satisfactory usage and specific data to permit establishment of allowable stresses or pressure rating, maximum and minimum temperature limits, and other restrictions. Additional criteria can be found in the guidelines for addition of new materials in the ASME Boiler and Pressure Vessel Code, Section II and Section VIII, Division 1, Appendix B. [To develop usage and gain experience, unlisted materials may be used in accordance with para. 811.2(b).]

Effective Date

This Edition, when issued, contains new Code provisions. It is a compilation of the 2007 Edition and revisions to the 2007 Edition.
