

ASABE/ISO 27850:2013 MAR2024

Tractors for agriculture and forestry — Falling object protective structures — Test procedures and performance requirements

ASABE

American Society of Agricultural
and Biological Engineers

STANDARD

ASABE is a professional and technical organization, of members worldwide, who are dedicated to advancement of engineering applicable to agricultural, food, and biological systems. ASABE Standards are consensus documents developed and adopted by the American Society of Agricultural and Biological Engineers to meet standardization needs within the scope of the Society; principally agricultural field equipment, farmstead equipment, structures, soil and water resource management, turf and landscape equipment, forest engineering, food and process engineering, electric power applications, plant and animal environment, and waste management.

NOTE: ASABE Standards, Engineering Practices, and Data are informational and advisory only. Their use by anyone engaged in industry or trade is entirely voluntary. The ASABE assumes no responsibility for results attributable to the application of ASABE Standards, Engineering Practices, and Data. Conformity does not ensure compliance with applicable ordinances, laws and regulations. Prospective users are responsible for protecting themselves against liability for infringement of patents.

ASABE Standards, Engineering Practices, and Data initially approved prior to the society name change in July of 2005 are designated as “ASAE”, regardless of the revision approval date. Newly developed Standards, Engineering Practices and Data approved after July of 2005 are designated as “ASABE”.

Standards designated as “ANSI” are American National Standards as are all ISO adoptions published by ASABE. Adoption as an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by ASABE.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

CAUTION NOTICE: ASABE and ANSI standards may be revised or withdrawn at any time. Additionally, procedures of ASABE require that action be taken periodically to reaffirm, revise, or withdraw each standard.

Tractors for agriculture and forestry — Falling object protective structures — Test procedures and performance requirements

These materials are subject to copyright claims of ISO and ASABE. No part of this publication may be reproduced in any form, including an electronic retrieval system, without the prior written permission of ASABE. All requests pertaining to ASABE/ISO 27850:2013 MAR2024 standard should be submitted to ASABE.

The adoption of this standard was made possible by the signing of 2004 SAE-ASABE copyright agreements, which gave ASABE a royalty-free license to publish in whole or in part SAE standard document J167. Identical adoption of ISO 27850:2013 approved by the ASABE Machinery Systems Technical Community and ANSI May 2016; reaffirmed December 2020; revised March 2024.

Keywords: Falling object protection, Operator protection, Test

0 Foreword

0.1 ASABE/ISO 27850:2013, Tractors for agriculture and forestry — Falling object protective structures — Test procedures and performance requirements, is an adoption without modifications of the identically titled ISO standard ISO 27850:2015, Tractors for agriculture and forestry — Falling object protective structures — Test procedures and performance requirements.

0.2 This International Standard sets forth the test procedure and performance requirements for a falling object protective structure, in the event such a structure is installed on an agricultural or forestry tractor.

This International Standard is applicable to agricultural and forestry tractors having at least two axles for pneumatic tyred wheels or having tracks instead of wheels.

This International Standard does not apply to forestry machinery as defined in ISO 6814.

0.3 Seven normative reference(s) are listed in ISO 27850:2013. These references have been reviewed and accepted as part of the adoption of ASABE/ISO 27850:2013.

0.4 This standard has been approved as an American National standard by ANSI (American National Standards Institute).

Text of ISO 27850:2015, Tractors for agriculture and forestry — Falling object protective structures — Test procedures and performance requirements, follows.

1 Scope

This International Standard sets forth the test procedure and performance requirements for a falling object protective structure, in the event such a structure is installed on an agricultural or forestry tractor.

This International Standard is applicable to agricultural and forestry tractors having at least two axles for pneumatic tyred wheels or having tracks instead of wheels.

This International Standard does not apply to forestry machinery as defined in ISO 6814.
